Child Stunting and Overweight

Key figures and trends

MAY 2025

STUNTING

Progress towards World Health Assembly (WHA) Global Nutrition **stunting target**.

WHA Global Nutrition Stunting Target 2012-2025

Achieve a **40%** reduction in the number of children under-5 who are stunted

- Prevalence of stunting among children under five years old has fallen slightly since 2012 but remains *very high*.
- Rates in Benin are very close to the UN regional average for Western Africa.
- Despite modest progress, Benin remains highly off-track from the WHA target for child stunting, with a **gap of 13.3** between projection and target.

Figure 1: Under-five stunting prevalence, Benin, 2005-2022 and projected to 2025

Table 1: Under-five (U5) Stunting Data Profile, Benin

Key Indicator	Value
Baseline Prevalence 2012 (%)	33.9
Baseline U5 Population 2012 (millions)	1.8
Baseline Stunting Burden 2012 (millions)	0.6
Current Prevalence 2022 (%)	30.4
Current U5 Population 2022 (millions)	2.15
U5 Population Growth Rate 2012-2022 (%)	21.6
Current AARR* (2012-2022)	1.0
Projected Prevalence 2025 (%)	29.5
Target Stunting Burden 2025 (millions)	0.36
Projected U5 Population 2025 (millions)	2.22
Target Prevalence 2025 (%)	16.2
Required AARR (2012-25)	5.7
Classification of Country's Progress	Off track – some progress

*AARR = Average Annual Rate of Reduction

OVERWEIGHT

Progress towards World Health Assembly (WHA)
Global Nutrition **overweight target**.

- Prevalence of overweight among children under five years old, while still *very low* in Benin, has risen since 2012.
- Rates in Benin remain below the regional average for Western Africa.
- Benin is off-track to meet the WHA target for child overweight, with a **gap of 0.8** between projection and target.

Figure 2: Under-five overweight prevalence, Benin, 2005-2022 and projected to 2025

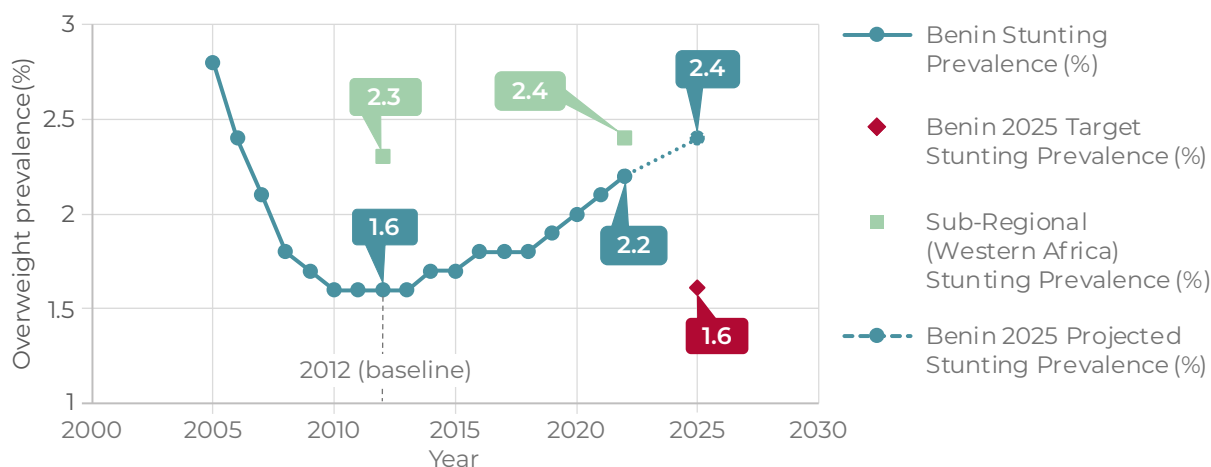

Table 2: Under-five (U5) Overweight Data Profile, Benin

Key Indicator	Value
Baseline Prevalence 2012 (%)	1.6
Current Prevalence 2022 (%)	2.2
Current AARR* (2012-2022)	-3.1
Projected Prevalence 2025 (%)	2.4
Target Prevalence 2025 (%)	1.6
Required AARR (2012-25)	0.0
Classification of Progress	Off track

*AARR = Average Annual Rate of Reduction

Data sources: Joint Malnutrition Estimates for stunting and overweight prevalences. Population from United Nations World Population Prospects. Classifications of progress are aligned with UNICEF methodology and determined by current AARR thresholds.
