I. PROJECT BACKGROUND AND SCOPE OF WORK

1. ABOUT GAIN

The Global Alliance for Improved Nutrition (GAIN) is a Swiss-based foundation launched at the UN in 2002 to tackle the human suffering caused by malnutrition. Working with both governments and businesses, we aim to transform food systems so that they deliver more nutritious food for all people.

At GAIN, we believe that everyone in the world should have access to nutritious and safe food. We work to understand and deliver specific solutions to the daily challenge of food insecurity faced by poor people. By understanding that there is no “one-size-fits-all” model, we develop alliances and build tailored programmes, using a variety of flexible models and approaches.

We build alliances between governments, local and global businesses, and civil society to deliver sustainable improvements at scale. We are part of a global network of partners working together to create sustainable solutions to malnutrition. Through alliances, we provide technical, financial and policy support to key participants in the food system. We use specific learning, evidence of impact, and results of projects and programmes to shape and influence the actions of others.

Headquartered in Geneva, Switzerland, GAIN has representative offices in Denmark, The Netherlands, the United Kingdom, and the United States. In addition, we have country offices in Bangladesh, Ethiopia, India, Indonesia, Kenya, Mozambique, Nigeria, Pakistan, and Tanzania. Programmes and projects are carried out in a variety of other countries, particularly in Africa and Asia.

2. BACKGROUND

The Global Alliance for Improved Nutrition (GAIN) is issuing this Request for Proposal (RFP) and will be the administrative lead organisation for this RFP.

One of our programs in Ethiopia is supporting food fortification. Food fortification is one of the key strategies endorsed by the Government of Ethiopia to reduce micronutrient deficiencies. GAIN is working with Government, private sectors and non-government organizations on wheat and oil fortification.

As part of the fortification program, GAIN is supporting laboratory capacity building on micronutrient testing in fortified wheat flour and edible oil. As Proficiency is one of the requirements to demonstrate the competence of a laboratory. Overall, there are not many PTs available for the specific analysis of micronutrients in fortified food. Therefore, GAIN is planning to explore the possibility of developing proficiency test in Ethiopia that covers the fortified wheat and edible oil micronutrient.

The purpose of this RFP is to engage services of a Service Provider to explore the possibility of developing proficiency test scheme in Ethiopia that covers the micronutrient in fortified wheat and edible oil.
