I. PROJECT BACKGROUND AND SCOPE OF WORK

1. ABOUT GAIN

The Global Alliance for Improved Nutrition (GAIN) is a Swiss-based foundation launched at the UN in 2002 to tackle the human suffering caused by malnutrition. Working with both governments and businesses, we aim to transform food systems so that they deliver more nutritious food for all people.

At GAIN, we believe that everyone in the world should have access to nutritious and safe food. We work to understand and deliver specific solutions to the daily challenge of food insecurity faced by poor people. By understanding that there is no “one-size-fits-all” model, we develop alliances and build tailored programmes, using a variety of flexible models and approaches.

We build alliances between governments, local and global businesses, and civil society to deliver sustainable improvements at scale. We are part of a global network of partners working together to create sustainable solutions to malnutrition. Through alliances, we provide technical, financial and policy support to key participants in the food system. We use specific learning, evidence of impact, and results of projects and programmes to shape and influence the actions of others.

Headquartered in Geneva, Switzerland, GAIN has representative offices in Denmark, The Netherlands, the United Kingdom, and the United States. In addition, we have country offices in Bangladesh, Ethiopia, India, Indonesia, Kenya, Mozambique, Nigeria, Pakistan, and Tanzania. Programmes and projects are carried out in a variety of other countries, particularly in Africa and Asia.

The Targeted Dietary Improvement Cluster (TDIC) tailors programmes to the specific needs of children, adolescents and workers. TDIC incorporates three core programmes: The Better Diets for Children programme works to provide caregivers and children with the opportunities and reasons to consume more of the healthier foods, less of the others. The Adolescent Nutrition programme works with adolescents to improve this generation and the next. Adolescents are experiencing multiple burdens of malnutrition, the increasing problem of overweight and obesity coexisting with continued high prevalence of underweight and micronutrient deficiencies. The Workforce Nutrition programme works with employers and buyers in global supply chains to the improvement the diets of workers and farmers, ideally as part of a broader approach to worker well-being and promotion of healthy lifestyles.

2. BACKGROUND

The Global Alliance for Improved Nutrition (GAIN) is issuing this Request for Proposal (RFP) and will be the administrative lead organisation for this RFP.

3. SCOPE OF WORK AND DELIVERABLES

Under the overall guidance of the Programme Lead, Better Diets for Children and in consultation with the Cluster Lead, programme and project managers, the consultant will develop a working paper series to explain some of GAIN’s child and adolescent flagship projects and position GAIN’s expertise on these themes. The working paper series will demonstrate how GAIN uses a range of approaches to improve nutrition among infants, children, adolescents and their families. These approaches include improving access to and utilization of, creating demand for and promoting nutritious foods. The consultant will be supplied and supported by GAIN staff with all relevant documents. Examples of GAIN’s working papers can be found on the GAIN website.

The project will start in May 2020.
3.1. Key tasks

- Lead on the development of four working papers, using the GAIN working paper template and branding guidelines. Finalise them with input from GAIN staff, documenting all steps taken.
- Prepare and propose the methodological approach, structure and content of the working paper.
- Develop a plan for the working paper, for GAIN review and approval.
- Collect and analyse data and information including desk review of relevant documents and key literature, and virtual face-to-face interviews. Prepare a list of all the resources utilized using defined inclusion/exclusion criteria.
- Remain in regular contact with the BDC Programme Lead and provide regular updates about the progress of the working papers.
- Write the full working paper, including methods, data collection activities, and conclusions/recommendations based on gain input.
- Support GAIN staff to disseminate the working papers.
- Coordinate with a designer, if required.
- Participate in meetings, as required.

The consultant will be cited as lead or co-author of the working papers.
