I. PROJECT BACKGROUND AND SCOPE OF WORK

1. ABOUT GAIN

The Global Alliance for Improved Nutrition (GAIN) is a Swiss-based foundation launched at the UN in 2002 to tackle the human suffering caused by malnutrition. Working with both governments and businesses, we aim to transform food systems so that they deliver more nutritious food for all people.

At GAIN, we believe that everyone in the world should have access to nutritious and safe food. We work to understand and deliver specific solutions to the daily challenge of food insecurity faced by poor people. By understanding that there is no “one-size-fits-all” model, we develop alliances and build tailored programmes, using a variety of flexible models and approaches.

We build alliances between governments, local and global businesses, and civil society to deliver sustainable improvements at scale. We are part of a global network of partners working together to create sustainable solutions to malnutrition. Through alliances, we provide technical, financial and policy support to key participants in the food system. We use specific learning, evidence of impact, and results of projects and programmes to shape and influence the actions of others.

Headquartered in Geneva, Switzerland, GAIN has representative offices in Denmark, The Netherlands, the United Kingdom, and the United States. In addition, we have country offices in Bangladesh, Ethiopia, India, Indonesia, Nigeria, Mozambique, Nigeria, Pakistan, and Tanzania. Programmes and projects are carried out in a variety of other countries, particularly in Africa and Asia.

2. BACKGROUND

In response to the COVID-19 global pandemic, GAIN developed the Keeping Food Market Working (KFMW), a programme of targeted support to help sustain core food systems, workers and markets during the COVID-19 emergency. GAIN’s goal is to mitigate the collapse of food systems by supporting food markets and the value chain companies in Low and Middle Income Countries (LMICs), especially in Africa and Asia, which face potentially catastrophic supply and demand disruption. GAIN will achieve this by establishing an emergency response programme to assess and address the challenges facing the food system. This programme has the overarching goal of mitigating the risk of economic collapse of food systems in order to sustain the availability and affordability of nutritious and safe foods, and contribute to lowering the burden of ill-health, particularly for the most vulnerable. The prospective consultant will be introduced to the relevant market stakeholders including Market Response Units, AMAC representatives, and other peer consultants currently working on the project based on existing relationships already nurtured by GAIN

3. SCOPE OF WORK AND DELIVERABLES

GAIN seeks to hire a consultant to:

- 1.** assess the current physical layout and infrastructure of Gosa and Utako markets in AMAC, Abuja.
- 2.** assess how consumers and vendors interact and use the current infrastructure; and **iii)** provide recommendations for improvements or additions to the markets infrastructure to improve the flow of people, safety of food and health of consumers and vendors under COVID19.

Key responsibilities:

The service provider shall;

1. Work with GAIN country lead to understand the nature of the project, the objectives and review existing materials related to the anticipated outcome of this task
2. Conduct an assessment of the physical infrastructure, observe how people interact with the infrastructure and its current state of accessibility (is it in use, broken, too expensive for consumers/vendors to access, etc.)
3. Develop a map of the physical infrastructure indicating their functionality status.
4. Attend 1-2 of GAIN’s market response unit meetings to gain insights on infrastructural needs from market stakeholders.
5. Write and submit a report that provides a summary of observations and recommendations for improvements.
