## **I. PROJECT BACKGROUND AND SCOPE OF WORK**

### **1. ABOUT GAIN**

The Global Alliance for Improved Nutrition (GAIN) is a Swiss-based foundation launched at the UN in 2002 to tackle the human suffering caused by malnutrition. Working with both governments and businesses, we aim to transform food systems so that they deliver more nutritious food for all people. At GAIN, we believe that everyone in the world should have access to nutritious and safe food. We work to understand and deliver specific solutions to the daily challenge of food insecurity faced by poor people. By understanding that there is no “one-size-fits-all” model, we develop alliances and build tailored programmes, using a variety of flexible models and approaches. We build alliances between governments, local and global businesses, and civil society to deliver sustainable improvements at scale. We are part of a global network of partners working together to create sustainable solutions to malnutrition. Through alliances, we provide technical, financial and policy support to key participants in the food system. We use specific learning, evidence of impact, and results of projects and programmes to shape and influence the actions of others.

### **2. BACKGROUND**

The Fortification of Edible Oil Project, Phase III in Bangladesh focuses on improving access of Vitamin-A Fortified Edible Oil within the Bangladesh market, improve Quality Control and Quality Assurance (QA/QC) of Edible Oil Fortification in Bangladesh. The overall target of the project is to the reduction in prevalence of vitamin-A deficiency in the population of Bangladesh through consumption of vitamin A fortified edible oil and to ensure all edible oil are adequately fortified and available to consumers. To achieve these objective the monitoring cell of Bangladesh Standards and Testing Institution under Ministry of Industries (MOInd) working relentlessly to ensure compliance of oil refineries through regular inspection and surveillance at factory and market level. In the fortification process, vitamin A premix is an important and critical element and it is totally imported item. Thus, the quality, price and availability of vitamin A premix are fundamental to make the success of fortified edible oil program in the country. Vitamin A premix is fully imported items from several overseas sources as per convenience of oil refineries. Therefore, the quality control and purity testing of vitamin A premix is important to ensure uniform standard quality of Vitamin A premix as well as to prevent importation of counterfeit premix. However, in Bangladesh there have limited expertise on vitamin A premix purity testing till date which is adversely affecting the overall success of the oil fortification project. Therefore the project is currently working on analytical and stability testing of vitamin A premix.
