I. PROJECT BACKGROUND AND SCOPE OF WORK

1. ABOUT GAIN

The Global Alliance for Improved Nutrition (GAIN) is a Swiss-based foundation launched at the UN in 2002 to tackle the human suffering caused by malnutrition. Working with both governments and businesses, we aim to transform food systems so that they deliver more nutritious food for all people.

At GAIN, we believe that everyone in the world should have access to nutritious and safe food. We work to understand and deliver specific solutions to the daily challenge of food insecurity faced by poor people. By understanding that there is no "one-size-fits-all" model, we develop alliances and build tailored programmes, using a variety of flexible models and approaches. We build alliances between governments, local and global businesses, and civil society to deliver sustainable improvements at scale. We are part of a global network of partners working together to create sustainable solutions to malnutrition. Through alliances, we provide technical, financial and policy support to key participants in the food system. We use specific learning, evidence of impact, and results of projects and programmes to shape and influence the actions of others.

Headquartered in Geneva, Switzerland, GAIN has representative offices in the Netherlands, the United Kingdom, and the United States. In addition, we have country offices in Bangladesh, Benin, Ethiopia, India, Indonesia, Kenya, Mozambique, Nigeria, Pakistan, Rwanda, Tanzania and Uganda. Programmes and projects are carried out in a variety of other countries, particularly in Africa and Asia.

2. BACKGROUND

The Food Systems Countdown Initiative (FSCI) ("the Countdown") is a global effort to monitor and track the progress of food systems transformation. Developed by an interdisciplinary collaboration of scientists following the 2021 United Nations Food Systems Summit, the FSCI utilizes a 50-indicator framework to provide annual insights that support Sustainable Development Goals (SDGs) and other global targets. This initiative aims to equip stakeholders—such as civil society, governments, and international organizations—with the evidence needed to make informed, transformative decisions in food systems.

The FSCI is working to build a science-based observational system using a food systems framework to track global food systems and their changes to 2030. Given the complexity and cross-sectoral nature of food systems, this monitoring framework is essential to measure all aspects of these systems and their interactions. By providing transparent and data-driven assessments, the FSCI framework helps guide decision-makers and hold accountable those in positions of power to ensure meaningful food system changes.

The FSCI is seeking to engage country consultants in Malawi to support the validation, adaptation, and potential adoption of its 50-indicator framework for food systems monitoring at both national and sub-national levels. This work is part of a broader project to better inform food system transformation action and prioritization in these countries.

3. SCOPE OF WORK AND DELIVERABLES

The selected consultant shall provide the following services:

The consultant will contribute to this work by providing the following specific services:

- 1. Undertake a comprehensive situational analysis of:
 - Current monitoring systems used in the country related to food systems including those managed separately by different ministries, departments, or agencies
 - Current data-driven approaches within food system components or sectors or food systems as a whole

- · Available national and sub-national policies, programs, initiatives, and data relevant to food systems
- 2. Conduct interviews with key stakeholders, including:
 - Relevant government officials including food system policy and decision-makers.
 - Representatives from CGIAR, UN agency country offices, academic institutions, private sector, INGOs and NGOs working in food systems.
- 3. Organize and manage the participatory and validation workshops by:
 - · Identifying food system policy and decision-makers to invite
 - · Leading logistical preparations (meeting venue, catering, audio/visual)
 - Identify country-specific indicators to measure positive food system transformation
 - Assisting the co-lead to adapt and validate the FSCI framework to the country context
- 4. Support the customization of the FSCI monitoring framework for national use, including:
 - Identifying appropriate data disaggregation levels
 - · Determining data acquisition needs including source, method, frequency of collection
 - Suggesting areas where the FSCI could be strengthened for country-specific challenges compared to global FSCI
- 5. Contribute to the development of policy briefs and reports summarizing findings and recommendations.
- 6. Liaise with GAIN and other local partners to ensure smooth implementation of project activities.
- 7. Assist in organizing a multi-stakeholder workshop for the validation of findings and elaboration of next steps.

3.1 OBJECTIVES

The primary objective of this consultancy is to support the validation, adaptation, and potential adoption of the Food Systems Countdown Initiative (FSCI) 50-indicator monitoring framework within Malawi. This work aims to strengthen food systems monitoring at national and sub-national levels, providing actionable insights to facilitate food systems transformation.
